SUPPLEMENT VIEWER TOOL

FOR ACROBAT READER

Information Consultants, Inc. (INFOCON) developed this tool as a joint effort of the Air Force Departmental Publishing Office at the Pentagon and the Documentation and Publishing Section at Headquarters Standard Systems Group, Gunter Annex, to allow users the ability to view a publication and a supplement simultaneously. Both documents are displayed in two windows, side-by-side, giving the user full scrolling capabilities.

This tool is still in its testing phase. The ultimate goal for supplements is to integrate them into the publication. Your suggestions for improvement are vital for the effectiveness of the tool. Send any comments or suggestions to ssg.ilspd@gunter.af.mil. We are already looking into changing the windows to horizontal viewing, instead of vertical viewing. This should provide full width viewing of the documents.

To continue, please read the [readme.txt](#) file on the root level of this CD.
